### **DETAILED ACTION**

### Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Claims 1, 2-8 and 17 are drawn to control processing in the server or headed, classified in class 725, subclass 93.
- II. Claims 9-16, 18 and 19 are, drawn to receivers in a VOD system, classified in class 725, subclass 100.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as control processing and scheduling in a VOD system. See MPEP § 806.05(d).

During a telephone conversation with Adam Forman on 8/6/04 a provisional election was made without traverse to prosecute the invention of I, claims 1, 2-8 and 17. Affirmation of this election must be made by applicant in replying to this Office action.

Claims 9-16, 18 and 19 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Art Unit: 2611

## Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by the article on Reducing I/O demand in Video-On-Demand Storage servers (cited by Applicant) hereinafter "article".

Regarding claim 1, the Article discloses a system and method of VOD piggybacking. The Article teaches merging two VOD streams, the "target transmission" stream is the initial stream transmitted. The claimed "scheduling a first transmission of a program in response to a client request by a client, wherein the program has a playback rate" is met by the service a second request by a client for the same video (see page 28 paragraphs 2 and 3 on the left). Since the there is no change or alteration in the initial or target transmission, the Article discloses the claimed "absent a change in the target transmission". The Article further discloses receiving a composite of the target transmission and the first transmission (see page 28 paragraphs 2 and 3 and page 29 fig. 4 and the paragraph following, noting the composite as streams I and j). It should be noted that each stream is transmitted in real time, i.e., at the time of request and is not "time distorted". The Article still further discloses merging the two streams is

Art Unit: 2611

possible by altering the display and transmission rates by adding or removing frame (see page 27 the 4'th and 5'th paragraphs on the left). The target stream will have a transmission rate (playback rate) of 30 frames/sec and the first stream will have a display rate of  $30 \times 11/10$  (adding a frame for every 10). It should be noted that the composite data rate, for both streams is "non-integer multiple" of the playback rate [(30 + 30 x 11/10) or the composite is a non integer multiple of the playback rate 30)].

### Allowable Subject Matter

Claims 2-8 and 17 are allowed.

#### Conclusion

Any response to this final action should be mailed to:

### **Box AF**

Commissioner of Patents and Trademarks Washington, D.C. 20231

### or faxed to:

(703) 872-9314 (for formal communications; please mark "EXPEDITED PROCEDURE")

### Or:

(703) 872-9314 (for informal or draft communications, please label "PROPOSED" or "DRAFT")

Hand-delivered responses should be brought to Crystal Park II, 2121 Crystal Drive, Arlington. VA., Sixth Floor (Receptionist).

Art Unit: 2611

1. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Vivek Srivastava whose telephone number is (703) 305-4038. The examiner can normally be reached on Monday-Friday from 8:00am to 5:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Chris Grant, can be reached on (703) 305-4755.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to customer service whose telephone number is (703) 306 0377.
